### NESS: New Electrified Supercharging System

[KASI Technologies](#) in Smedjebacken manufactures an in-house developed product, NESS, that converts petrol and diesel cars into electric hybrids. The promising technology has led the EU to invest up to SEK 80 million in the company.

NESS can be fitted on 98 % of Europe's automotive passenger and light commercial vehicle fleets, saving up to 20 % in fuel consumption.

The company's founder **Isak Löfgren** got the idea for NESS, already 15 years ago, and with a background in the automotive industry, he saw an opportunity to reduce fuel consumption in the fossil-fueled vehicles that are already on our roads today.

He will tell us about NESS and the company which is now growing and hiring rapidly.

---

**TIME: Wednesday September 20, 2023 at 18:00**

**VENUE: HÖGBERGSKYRKAN, S. Järnvägsgatan 29**

Sandwiches and beer/water cost SEK 50 and are served from 17.15

Registration for sandwich/drink: Harvey Hammarsten [clubmaster@vbik.se](mailto:clubmaster@vbik.se)  
or 070-678 74 32 latest Monday September 18!
